PIMReC

Project tasks (2/2):

3. Forming mechanisms for emergency response and ways of interaction with relevant services in case of tourists' life and health hazards.

4. Creation of electronic services platform as an effective information resource on the one hand for the exchange of experience and training materials between Polish and Ukrainian high mountain rescue teams and on the other hand a tool to inform tourists about preventive measures of being in the high mountain area, safety routes and meteorologic forecast.
